Senior Product Designer with 4+ years across EdTech, fintech and consumer products, a computer engineering degree and an MS in HCI from the University of Maryland. I take ambiguous briefs to shipped, developer-ready experiences, and prototype in code when a mockup won't settle the question.

EXPERIENCE

Lollypop Design Studio · Senior UX Designer — Aug 2026 – Present

- Lead pre-sales design for enterprise pitches, replacing static mockups with working POCs built in Claude Code and Figma Make. **20% pitch win rate**, winning **4 enterprise clients** across fashion, EdTech and consulting.
- Introduced AI-assisted prototyping into client work, cutting concept-to-clickable-prototype time **from 4 days to 4 hours**.
- Designing an enterprise tech company's website on a fully AI-first workflow: merged three homepage directions into one from client feedback and built a reusable template system for its vertical landing pages.
- Leading end-to-end design of an HR consulting firm's website, from discovery through high-fidelity design and handoff.
- Run team workshops on AI prototyping and portfolios, including "Make It Make Sense: Figma Make for POCs."

Lollypop Design Studio · Associate Senior UX Designer — Nov 2024 – Jul 2026

- Set UX direction for a B2B EdTech client across a 1-year retainer, starting from an ambiguous brief: led problem framing, designed the end-to-end experience and shipped component-level specs that cut developer back-and-forth. Its school-counselling product is in final testing ahead of launch.
- Designed AI search and discovery for a luxury jewellery e-commerce brand: voice queries go straight to a visual grid, text queries to a two-question concierge with tappable answers, demoed as a working prototype.
- Redesigned a national barbecue restaurant chain's table-booking flow toward a 50% digital-booking target, up from 26% (launching soon), and cut its catering tracker from seven workflow states to five user-facing steps.
- Audited a financial-services product across 100+ screens, surfaced 15 high-priority usability issues and delivered a prioritized fix roadmap.
- Earned Lollypop's Above & Beyond Award (Q3 2025) for supporting teammates' client projects alongside my own.

Revent Solutions · Product Designer — Oct 2023 – Jul 2024

- Designed a B2C fintech app end-to-end: 125+ high-fidelity screens from wireframes to developer-ready specs, including a restructure of its information architecture.
- Ran competitive analysis of 2 adjacent products to define a differentiated brand identity and UX voice.

University of Maryland · UX Designer — Mar 2022 – May 2023

- Ran a heuristic evaluation that found 34 usability issues, then redesigned the affected flows.

PROJECTS

Strippd — Live karaoke track generator. Designed and built end-to-end with Claude Code: UI, audio-processing logic and production deployment.

AI Labs — brew'd and Sage, native iOS apps I designed and built in SwiftUI and use daily, plus Link'd, a Figma plugin.

EDUCATION

University of Maryland, College Park · MS, Human–Computer Interaction — GPA 4.00/4.00 · May 2023

University of Mumbai · BTech, Computer Engineering — GPA 9.36/10 · May 2021

SKILLS

Design	Product & platform UX, UX strategy, user research, interaction & visual design, design systems, prototyping
AI & build	Claude Code, Figma Make, HTML/CSS, GitHub, Vercel
Tools	Figma, Framer, Webflow, Adobe Creative Suite, Jira
